

Collaboration Meeting: TDAQ Update

Sara Gamba, University of Pisa
Pavel Murat, FNAL

March 18th 2024

Working area

- 3 test stands (IERC);
- A pulser implemented in the DRACs is sending pulses to the preamps (CAL side);
- The generator frequency is 50 kHz;
- Pulses are digitized at 40 MHz;
- Only 12 channels pulsed per RUN (one pulse every 8 channels);
- We are using 1 or 2 ROCs at the same time.

Trying to understand failure modes and features of the boards
